Test Description

This UNIX Shell Programming test is designed to assess the knowledge of test takers in using the UNIX Shell. The topics covered include UNIX Shell commands, syntax, file structure, environmental variables, the VI editor, file permissions, and pipes and filters. It is appropriate to administer this assessment to beginner and intermediate programmers who have over one year of experience with UNIX Shell.

- Test takers, please contact your test administrator or recruiter for scoring guidelines.
- Administrators, please refer to the Scoring Guidelines page within the Resources section of your Administration Center for scoring guidelines.
